

Broadband signalling — acronyms

AAL	ATM adaptation layer	ATM-F	ATM Forum
AAP	atomic action protocol	ATS	abstract test suite
ABIND	advanced broadband IN demonstrator	B-BCC	broadband bearer channel connection
ABR	available bit rate	BBSM	basic bearer state machine
ABT	ATM bulk transfer	BC	bearer channel, <i>or</i> bearer control
AC	access control	BCAF	bearer control agent function
ACF	authentication control function, <i>or</i> access control function	BCC	bearer connection control
ACM	address complete message	BCCMS	BUNI command and control message set
ADF	authentication data function, <i>or</i> access data function	BCF	bearer control function
AE	application entity	BCSM	basic call state machine
AESA	ATM end-system address	BHCA	busy hour call attempts
AINI	ATM internetwork interface	B-HLI	broadband high layer identifier, <i>or</i> broadband high layer information
ALS	application layer service, <i>or</i> application layer structure	B-ICI	broadband inter-carrier interface
AN	access network	B-ISDN	broadband ISDN
ANF	access network function	B-ISUP	broadband ISDN user part
ANM	answer message	BIT	broadband I/F tester
ANS	answer message	B-LLI	broadband low layer information
ANSI	American National Standards Institute	B-QSIG	B-ISDN private network signalling system (Q interface)
API	application programming interface	BR	basic rate
AS	abstract service, <i>or</i> access signalling	BSI	British Standards Institute
ASE	application service element	B-TE	broadband terminal equipment
ASG	abstract service group	BUNI	broadband user/network interface
ASM	abstract service module	BVPN	broadband VPN
ASN	Abstract Syntax Notation	CAC	connection admission control, <i>or</i> call admission control
ASO	application service object	CAMEL	customised applications for mobile network enhanced logic
ATC	ATM transfer capability	CC	call control, <i>or</i> connection control
ATIS	Alliance for Telecommunications Industry Solutions	CCA	call control agent
ATM	asynchronous transfer mode		

CCAF	call control agent function	CSA	call segment association
CCF	call control function	CTP	connection termination point
CCIR	International Radio Consultative Committee	CUG	closed user group
CCITT	International Telephone and Telegraph Consultative Committee	DAVIC	Digital Audio-Visual Council
CCITT SS No 7	CCITT Signalling System No 7	DB	database
CCR	commitment, concurrency and recovery	DCC	data country code
CCSUA	call control service user application	D-channel	data channel (N-ISDN)
CDME	composite downstream mapping element	DDI	direct dialling in
CDV	cell delay variation	DFP	distributed functional plane
CDVT	cell delay variation tolerance	DP	detection point
CF	control function	DPC	destination point code
CLIP	calling line identification presentation	DPE	distributed processing environment
CLIR	calling line identification restriction	DS	delivery system
CLP	cell loss priority	DSM-CC	digital storage media command and control
CLR	cell loss ratio	DSP	domain specific part
CM	connection manager	DSS	digital subscriber signalling
COBI	connection-oriented bearer-independent	DSS1	Digital Subscriber Signalling System No 1
COLP	connected line identity presentation	DSS2	Digital Subscriber Signalling System No 2
COLR	connected line identity restriction	DTL	designated transit list
CORBA	Common Object Request Broker Architecture	DVB	Digital Video Broadcast
CP	confirmed party	ECMA	European Computer Manufacturers Association
CPCS	common part convergence sub-layer	EEC	European Economic Community
CPE	customer premises equipment	E-E	end-to-end
CPH	call party handling	EN	European Norm (the new form of European Telecommunications Standard), or equipment number
CPS	content provider system	ESI	end-system identifier
CPSL	confirmed party service link	ETR	ETSI technical report
CRC	cyclic redundancy check (error checking field)	ETS	European Telecommunications Standard
CRV	call reference value	ETSI	European Telecommunications Standards Institute
192 CS	capability set (-1, -2, or -3)	FDMA	frequency division multiple access

FE	functional entity	IMN	intelligent management network
FINDS	fast Internet demonstrator and studies	IMS	interactive multimedia service
FM	fabric management	IMT	International Mobile Telecommuni- cations
FMC	fixed/mobile convergence	IN	intelligent network
FNA	functional network architecture	INAP	intelligent network application part (protocol)
FSAN	full services access network	IP	Internet protocol, <i>or</i> intelligent peripheral
GCAC	generic call admission control	I-PNNI	integrated PNNI
GFC	generic flow control	ISDN	integrated services digital network
GFP	generic functional protocol	ISO	International Standards Organisation
GFT	generic flow transport	ISUP	ISDN user part
GIT	generic identifier transport, <i>or</i> generic information transport	IT	information technology
GPRS	Generalised Packet Radio Service	ITU	International Telecommunication Union
GSM	global system for mobile communications	ITU-R	International Telecommunication Union — Radio Standardisation Sector
GUI	graphical user interface	ITU-T	International Telecommunication Union — Telecommunication Standardisation Sector
HDTV	high-definition television	IWU	interworking unit
HLF	higher layer function	L1GW	level 1 gateway
HMI	human/machine interface	LEX	local exchange
HTML	hypertext mark-up language	LGN	logical group node
HTTP	hypertext transfer protocol	LIJ	leaf-initiated join
IAA	IAM acknowledge message	LLF	lower layer function
IAM	initial address message	LME	layer management entity
IAN	interworking among ATM networks	LRCF	location registration control function
IAR	IAM reject message	LRDF	location registration data function
IC	interlock code	LSP	logical service port
ICD	international code designator	LUP	logical user port
IDL	Interface definition language	MA	medium adapter
IDP	initial domain part, <i>or</i> initial detection point	MAC	message authentication code
IE	information element	MAGIC	multiservice applications governing integrated control
IETF	Internet Engineering Task Force	MBS	maximum burst size
IFAM	initial and final address message		
IISP	interim inter-switch signalling protocol		

BROADBAND SIGNALLING — ACRONYMS

MC	maintenance control	ORB	Object Request Broker
ME	mapping element	OSI	open systems interconnection
MHEG	multimedia and hypermedia experts group	OSPF	open shortest path first
MPEG	moving picture experts group	PAR	PNNI augmented routeing
MSN	message sequence number, <i>or</i> multiple subscriber number	PBX	private branch exchange
MST	multiservice terminal	PC	point code
MSU	message signal unit	PCR	peak cell rate
MSVCI	metasignalling virtual channel identifier	PDU	protocol data unit
MTP-3 (or -3b)	message transfer part level 3 (or 3b)	PG	peer group
MTS	message transmission sub-system	PGID	peer group identifier
NCCI	network call correlation identifier	PGL	peer group leader
NI	network interface	PICS	protocol implementation conformance statement
NICC	Network Interoperability Consultative Committee	PIN	personal ID number
NIP	network intelligence platform	PINT	PSTN/Internet interface
N-ISDN	narrowband ISDN	PINX	private integrated service network exchange
NIU	network interface unit	PIXIT	protocol implementation extra information for testing
NNI	network/node interface, <i>or</i> network/network interface	PMD	physical medium dependent
NSAP	network service access point	PN	personal numbering
OAM	operations, administration and maintenance	PNNI	private network/network interface
OBCA	originating bearer control agent	PNO	public network operator
OCCA	originating call control agent	PNOIG	Public Network Operators Interconnect Group
ODP	open distributed processing	PON	passive optical network
ODP-RM	Open Distributed Process Reference Model	POTS	plain old telephony service
Oftel	Office of Telecommunications	PR	primary rate
OG	outgoing	PS	party set
OMG	Object Management Group	PSA	proxy signalling agent
ONP	open network provision	PSP	physical service port
OO	object oriented	PSPDN	packet switched public data network
OPC	originating point code	PSTN	public switched telephone network
		PSVC	point-to-point signalling virtual channel

PSVCI	point-to-point signalling virtual channel indicator	SCS	service consumer system, <i>or</i> service creation system
PTSE	protocol topology state element	SDF	service data function
PTSP	protocol topology state packet	SDH	synchronous digital hierarchy
PUP	physical user port	SDL	specification and design language
PVC	permanent virtual connection, <i>or</i> permanent virtual circuit	SDP	service data point
QoS	quality of service	SDU	service data unit
QSIG	N-ISDN private network signalling system (Q interface)	SeC	session control
RACE	research and development in advanced communications in Europe	Sess	session
RASM	remote abstract service module	SG	Study Group (ITU-T)
RBC	relay bearer control	SIB	service-independent building block
RC	resource control	SID	signalling identifier
REL	release	SIF	signalling information field
RELIC	recall last incoming call	SIO	service information octet
RLC	release complete	SLP	service logic program
ROSE	remote operations service element	SLS	signalling link selector
RPC	remote procedure call	SM	session manager
RSVP	resource reservation protocol	SMDS	Switched Multi-megabit Data Service
RTMC	real-time management co-ordination	SMF	system management function
SAAL	signalling AAL	SN	service node
SACF	single association control function	SNF	service network function
SAI	system access I/F	SNI	service node interface
SAO	single association object	SNMP	simple network management protocol
SAP	service access point	SPAN	simple protocol for ATM network
SAR	segmentation and reassembly	SPS	service provider system, <i>or</i> ETSI Technical Committee responsible for signalling and switching
SC	service control	S-PVC	soft permanent virtual circuit
SCCOP	service-specific convergence protocol	SRF	special resource function
SCCP	signalling connection control part	SRM	session and resource manager
SCF	service control function	SS7	CCITT Signalling System No 7
SCP	service control point, <i>or</i> signalling control part	SSCF	service-specific co-ordination function
SCR	sustainable cell rate	SSCOP	service-specific connection-oriented protocol
		SSF	service switching function

SSI	supplementary service interactions	UIMF	user information management function
SSP	service switching point	UME	upstream mapping element
STB	set-top box	UMTS	Universal Mobile Telecommunications System
STP	signalling transfer point		
STU	set-top unit	U-N	user-to-network
STUI	service to user information	UNI	user/network interface
SUB	sub-addressing	UPC	usage parameter control
SVC	switched virtual circuit, <i>or</i> signalling virtual channel	UTRA	UMTS terrestrial radio access
SVCI	signalling virtual channel identifier	UTSI	user to service information
SVP	switched virtual path	U-U	user-to-user
TC	Technical Committee, <i>or</i> transaction capability, <i>or</i> transmission convergence	UUS	user-to-user signalling
TCP	transmission control protocol	UUSI	user-to-user signalling implicit
TCP/IP	transmission control protocol/Internet protocol	VADSL	very high speed asymmetric digital subscriber line
TCS	TRIBUNE control server	VAP	VADSL access point
TDMA	time division multiple access	VBR	variable bit rate
TE	terminal equipment	VC	virtual channel
TEX	transit exchange	VCC	virtual channel connection
TINA-C	Telecommunications Information Networking Architecture Consortium	VCi	virtual channel identifier
TP	terminal portability	VCR	video cassette recorder
TRIBUNE	testing, ratification and interoperability of the broadband user/network interface	VHE	virtual home environment
TSB	Telecommunications Standards Bureau	VoD	video-on-demand
TTCN	tree and tabular combined notation	VP	virtual path, <i>or</i> virtual party
TTP	trail termination point	VPC	virtual path connection
UAC	user application control	VPCI	virtual path connection identifier
UBCF	user bearer control function	VPI	virtual path identifier
UCCF	user call control function	VPN	virtual private network
UDP	user datagram protocol	VPSL	virtual party service link
UFM	unified functional model	VUP	virtual user port
		WG	working group
		WTSC	World Telecommunications Standardisation Committee
196 UI	unrecognised information	WWW	World Wide Web
